EXPERIENCE

Adapts

Washington, US (Remote)

Software Engineer

Mar 2026 – Present

- Building **Adapts HC3** (Holistic Continuous Code Context), a patented engine that continuously indexes **1B+ lines of code** across **60+ languages** (COBOL to Go) into a deterministic, traversable knowledge graph – used by enterprises for legacy modernization, change impact analysis, and architecture discovery.
- Developing **MCP and API surfaces** that feed grounded code context to AI coding agents (Cursor, Codex, Copilot), **cutting agent token usage by 80%** by replacing probabilistic exploration with deterministic graph queries.

Blinkit

Gurgaon, India

Software Engineer II

Jan 2025 – Mar 2026

- Primarily contributed to **Promotions Service**, a microservice based on gRPC Framework, scaled it to handle peak traffic of over **2 Billion+ per day from 8 Million+ per day**.
- Demonstrated ownership by independently revamping functionalities for real-time offer visibility and applicability, optimizing the evaluation of **thousands of rules** to ensure **50ms execution time**.

Software Engineer I

Jun 2023 – Dec 2024

- Took complete end-to-end ownership of new features, independently rolling them out while **ensuring reliability and observability**, and enhancing the robustness of pre-existing systems.

Software Engineer Intern

Jan 2023 – Jun 2023

- Worked on migration of **Promotions Service**, a rule engine based on gRPC Framework, and built an internal web dashboard for creation and auditing of promotional offers.

OPEN SOURCE & PROJECTS

RunMeMaybe | Go |  

Jan 2026 – Feb 2026

- Built a **stack-based virtual machine** from scratch in Go with a hybrid stack+register architecture, lexer, parser, and Fetch-Decode-Execute cycle. Implements control flow (jmp/zjmp), 16 registers, and dispatch optimization via jump tables.

HerdControl | Go |  

Mar 2026

- Published a Go package for **request coalescing** to prevent the thundering herd problem – ensures only one in-flight execution per key while all duplicate callers receive the shared result.

Golang Contributor | Go

Mar 2025

- Contributed to the `sync.Once` package in Go (shipped in Go 1.25). Documented learnings on atomics, double-checked locking, and noCopy. [Writeup](#) 

EDUCATION

Shri Mata Vaishno Devi University

CGPA: 8.6 / 10.0

Bachelor of Technology in Computer Science

2019 – 2023

TECHNICAL SKILLS

Languages: Go, C/C++, Rust, Python, Java, SQL, JavaScript, HTML/CSS

Frameworks & Tools: gRPC, React, Git, Docker, GitHub Actions

ACHIEVEMENTS

Credit Suisse Global Coding Challenge '22: All India Rank 3, Global Rank 13 / 1900+

ACM ICPC '20: Regionalist

Competitive Programming: Codeforces Expert (1682), CodeChef 5-Star (2088), LeetCode Top 1% (2137)
