EXPERIENCE

Adapts

Washington, US (Remote)

Software Engineer

Mar 2026 – Present

- Building **Adapts HC3** (Holistic Continuous Code Context), a patented engine that continuously indexes **1B+ lines of code** across **60+ languages** (COBOL to Go) into a deterministic, traversable knowledge graph – used by enterprises for legacy modernization, change impact analysis, and architecture discovery.
- Developing **MCP and API surfaces** that feed grounded code context to AI coding agents (Cursor, Codex, Copilot), **cutting agent token usage by 80%** by replacing probabilistic exploration with deterministic graph queries.

Blinkit

Gurgaon, India

Software Engineer II

Jan 2025 – Mar 2026

- Primarily contributed to **Promotions Service**, a microservice based on gRPC Framework, scaled it to handle peak traffic of over **2 Billion+ per day from 8 Million+ per day**.
- Demonstrated ownership by independently revamping functionalities for real-time offer visibility and applicability, optimizing the evaluation of **thousands of rules** to ensure **50ms execution time**.

Software Engineer I

Jun 2023 – Dec 2024

- Took complete end-to-end ownership of various new features, independently rolling them out while **ensuring reliability and observability**, and enhancing the robustness of pre-existing systems.

Software Engineer Intern

Jan 2023 – Jun 2023

- Worked on migration of **Promotions Service**, a rule engine based on gRPC Framework at Blinkit, and made an internal web dashboard for creation and auditing of promotional offers running on the platform.

OPEN SOURCE CONTRIBUTIONS

Golang Contributor | Go, Git

March 2025 – Present

- Contributed to the **sync.Once** package in Golang while exploring Go internals. Documented my learnings [here](#) 🔗

DiceDB | Go, Git

Feb 2025 – Mar 2025

- DiceDB is an open-source, in-memory database optimized for reactive, real-time data operations on modern hardware. Added **ZADD** and **ZRANK** to DiceDB for low-latency sorted-set operations.
Codebase: github.com/DiceDB/dice 🔗

Ray Tracer | C++, Git

Jan 2025 – Feb 2025

- Developed a C++ ray tracer implementing ray-sphere intersections, shading, reflection, and camera controls to render realistic images
Codebase: github.com/dograprabhav/ray_tracer 🔗

EDUCATION

Shri Mata Vaishno Devi University

CGPA: 8.6 / 10.0

Bachelor of Technology in Computer Science

2019 – 2023

TECHNICAL SKILLS

Languages: Go, C/C++, Rust, Python, Java, SQL, JavaScript, HTML/CSS

Frameworks & Tools: gRPC, React, Git, Docker

ACHIEVEMENTS

2019 - 23	8.57/10.0	Multiple scholarships; ranked in top 5% of class
2022	13/1900+ (AIR 3)	Credit Suisse Global Coding Challenge '22
2020	Qualified	ACM ICPC Regionalist '20
-	Codeforces Expert	Max Rating: 1682, Top 3% out of 27K+ Indians  *
-	Codechef 5 Star	Max Rating: 2088, Top 1% out of 100K+ Indians  *
-	Leetcode Top 1%	Max Rating: 2137, Top 1% of 300K+ users  *
2021	776 / 34500+	Facebook Hackercup Qualification Round
2022	386, 517, 568	Google Kickstart multiple ranks under 600
